Cetățenie	Moldova
Permis de conducere	B
Autovehicul propriu	automobil personal

Despre mine

I'm in the IT industry for 6 years, I was beginning with coding the themes for ThemeForest, and after that, I started to study Email coding and started to work at the BigBangThems, where I coded Emails, Landing Pages and other site's functionality, after this company I started to work at CodeCrew, where was in the Email Marketing Industry, again :), but for the first year, the rest of years I was as an unofficial team lead, helped our team with all the questions which appear, studied the new platforms needed for the company, fixing bugs etc. Also, I coded more than 50% from the CodeCrew site, you can check how it looks here <https://codecrew.us> . Studied the Shopify E-Commerce Platform and the liquid language used here, as a result, i become an expert on this Platform. Started to study at UTM University, but abandoned this after 2 years, the reason? well .. i understood that the University doesn't make me grow as I wanted, and I decided to study myself :)
