Entered data on the site (new positions) and changed them depending on the circumstances.

Ключевые навыки

- Graphic design level - God (Photoshop, Figma, Illustrator, Corel Draw) everything related to vector and raster projects as well as UX / UI.

Video editing is average, mainly in Adobe Premiere.

Ability to work with brandbooks. The ability to work with 3D objects is average, mainly in Blender.

- Windows user and everything related to working on it - on level "what do you want to know?" (MS Office Excel, Word, Power Point, I know these a very high level up to Excel formulas and this is just a small part of what I know).

I Was a confident Linux user but switched to Windows due to commercial solutions on Windows.

- SMM - level - almost God, I know all the tricks except for testing the audience in AdsManager (a matter of time). Connections between accounts, simultaneous posts and stories on all linked accounts, and so on down the list, I don't deny that I might not know something, but it's unlikely.
