## Опыт работы

5 лет и 1 месяц

май 2022 - по настоящее время  
2 года

### Software Developer

**Pentalog**  
(Кишинев), IT, Интернет

- Fixed 70% of all critical security vulnerabilities in an internal collaboration platform
- Developed a middleware service to validate all files that are being uploaded to server for possible security concerns for an internal collaboration platform
- Refactored legacy code to improve reliability, scalability and maintainability

март 2022 - по настоящее время  
2 года и 2 месяца

### Security Software Developer

**Security Journey**  
( ), IT, Интернет

- \*Remote contract-based position
- Developed comprehensive security education content with a focus on creating vulnerable code samples and secure solutions for programming languages such as Go, Java, Python, and PHP, resulting in increased awareness and improved application security for all platform users.
- Streamlined and optimized Security Journey's educational content by refactoring outdated code and improving maintainability, readability, and performance, leading to a more effective training solution for clients.

июль 2021 - март 2022  
7 месяцев

### Software Developer

**EST Computer (Edifecs)**  
(Кишинев), IT, Интернет

- Designed and developed a dashboard module from scratch for a healthcare B2B product using Angular and Spring Framework, resulting in an intuitive user interface and improved functionality.
- Revised, modularized and updated old code bases to meet modern

development standards, reducing operating costs and improving functionality

октябрь 2020 - июль 2021  
9 месяцев

## Software Developer

### Urchin Systems

(Кишинев), IT, Интернет

- As a software developer for one of Urchin Systems' partners, Kuebix-, I worked on developing modules for their cloud-based transportation management system, leveraging technologies such as React, Angular, and Spring Framework to add new functionality for clients like Weis Markets, Topco, and Ahold USA.

сентябрь 2019 - октябрь 2020  
1 год

## Software Developer Team Lead

### Unifun

(Кишинев), IT, Интернет

- Managed a team of 5 junior developers and worked on developing VASUP, an ad VAS software that allows broadcasting targeted and interactive advertising teasers to "sleep" mobile phone displays, generating a minimal guaranteed monthly revenue of 250k+ USD. Designed and implemented security modules to protect client data at rest and multiple REST API microservices for integration with different mobile providers, while regularly consulting with internal customers on project status, proposals, and technical issues.

июль 2019 - сентябрь 2019  
2 месяца

## Software Developer

### Unifun

(Кишинев), IT, Интернет

- Revised and refactored old code bases to modern development standards, implementing new functional modules as needed.
- Stress-tested server code to validate performance and performed software testing to uncover bugs and troubleshoot business logic issues prior to application launch.

апрель 2019 - июль 2019  
2 месяца

## Software Developer Intern

### Unifun

(Кишинев), IT, Интернет

- Studied fundamentals of networks, OSI, system administration, and Linux.
- Learned software development and design best practices

январь 2019 - апрель 2019  
3 месяца

## Software Developer

### Freelance

(Кишинев), IT, Интернет

Designed and developed modules for various web applications using modern tools and languages including Go, Java, PHP, and JavaScript with frameworks such as Spring and React. Focused primarily on backend development, occasionally working on full-stack projects.
